Dear Professor Cristian Marchioli,

It is my great pleasure on behalf of the Beijing International Center for Theoretical and Applied Mechanics (BICTAM) to invite you to give a lecture in the Institute of Mechanics, Chinese Academy of Sciences in the afternoon of Thursday, September 7th, 2017. The topic of your lecture will be on "*Large-Eddy Simulation of Turbulent Dispersed Flow: Modelling subgrid effects on particle dispersion*".

BICTAM's aim is to serve the interest of the countries in the Asian-Pacific region and other developing countries for the benefit of advancement in science and technology. Since 2007 BICTAM had established its secretariat and shared a part of office building in the Institute of Mechanics, CAS, including lecture room, meeting room and some offices for visiting guests. Dozens of regular summer schools workshops, and symposiums of various topics were held in different places of China. Approved by the General Assembly of the International Union of Theoretical and Applied Mechanics (IUTAM) in 2010, BICTAM becomes one of the affiliated organizations of IUTAM.

We are sure that your coming visit and the lecture on the hot issue in mechanics will certainly enhance BICTAM's influence in the Asian-Pacific region. If there's any query, please feel free to contact us.

We look forward to meeting you soon.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Jiachun Li". The signature is fluid and cursive, with a distinct loop at the end.

Jiachun Li
Professor, Co-chair of Scientific Committee of BICTAM
